

## Santiago Muriel Bedoya

Santiago Muriel Bedoya is the Director of Operations at Radiante Strategy Group, where he demonstrates a strong commitment to serving and supporting the community through his work. With prior experience as a systems administrator at AnaviGroup Toro Taxes, Santiago has focused on supporting the Latinx community in Delaware, providing expert guidance to clients seeking future stability in the USA.

Drawing on his expertise in programming and computing, Santiago applies his knowledge to make a positive impact in the social impact space. He holds a bachelor's degree in computer & network security from Wilmington University, specializing in cybersecurity principles and practices. Santiago's comprehensive understanding of the ever-evolving threat landscape enables him to effectively mitigate risks and ensure the security of sensitive information.

Certified as a security analyst and Information Technology specialist by Cisco and CompTIA, Santiago possesses a wide range of skills in network security, cryptography, secure coding, penetration testing, and incident response. He excels in implementing robust security measures, conducting vulnerability assessments, and analyzing security logs to detect and address potential breaches.

Santiago remains at the forefront of industry trends and advancements in cybersecurity through continuous learning and professional development. He is passionate about promoting cybersecurity awareness and educating others on best practices for safeguarding data. Santiago is excited to contribute his expertise to an organization that prioritizes data protection and user privacy, making a lasting impact in the field of computer and network security.
